Summary

I am a results-driven Product Analyst with experience across SaaS platforms, data analytics, AI-powered solutions, and product operations. I use SQL, Databricks, Power BI, Python, APIs, and monitoring tools to analyze complex data, troubleshoot technical issues, and drive data-informed product improvements. I have hands-on experience with conversational AI, prompt engineering, LLM applications, RAG, AI agents, and workflow and chatbot automations, with a focus on designing practical AI solutions that improve user experiences and operational efficiency. I collaborate with cross-functional teams to translate business requirements into scalable, user-centric products and AI-driven solutions.

Education

B.E in Mechanical Engineering
Dayananda Sagar Academy of Technology and Management
03/2020 – 04/2023

Diploma in Automobile Engineering
PES Polytechnic
05/2017 – 03/2020

Professional Experience

Tech Analyst

Cint

05/2025 – Present

- Lead technical investigations across a SaaS platform by analyzing survey configurations, data flows, API behavior, and platform functionality to resolve complex client-reported issues.
- Perform API debugging using Bruno and conduct root cause analysis with OpenSearch and Grafana by analyzing requests, logs, metrics, and system behavior.
- Utilize Databricks and SQL for large-scale data extraction, validation, and analysis, while using advanced Google Sheets formulas for daily data analysis, reporting, and operational tracking.
- Create and maintain Power BI and Salesforce dashboards to improve reporting, operational visibility, and data-driven decision-making.
- Played a key role in the implementation and testing of a Salesforce Agentic AI chatbot, validating conversational flows, responses, functionality, and overall user experience.
- Collaborate with product, engineering, and operations teams while managing Jira tickets, client cases, and Confluence documentation to drive issue resolution, platform improvements, and knowledge sharing.

Associate Technical Support Engineer

ChargePoint

04/2024 – 04/2025

- Resolved complex client issues using Jira, AI-powered tools, and data analysis to identify root causes and deliver effective solutions.
- Troubleshot complex product issues and provided clear, business-focused technical solutions to clients.
- Managed U.S. client communications through calls and support channels, collaborating with internal teams to drive timely issue resolution.

Graduate Engineer Trainee

TK Elevator

07/2023 – 03/2024

- Supported client communication, project coordination, and system installation activities to ensure smooth project execution.
- Assisted with project scheduling, milestone tracking, and resource coordination alongside senior engineers.
- Provided technical support, tracked client interactions in Salesforce, and used Excel for basic data analysis and reporting.

Projects

VoxSurvey Labs

- Designed a voice-first survey platform focused on accessibility, incorporating Speech-to-Text (STT) and Text-to-Speech (TTS) for conversational survey experiences.
- Defined product requirements, survey workflows, and user experiences, while building functional prototypes and reporting workflows to validate the concept and improve survey insights.

Personal Budget Tracker

- Developed a Python-based Personal Budget Tracker using OOP and JSON to manage, categorize, and persist income and expense transactions.
- Implemented Matplotlib visualizations, transaction filtering, balance calculations, and summary reports to help users understand their spending patterns.

Skills

- SQL
- Python
- Databricks
- Power BI
- Advanced Google Sheets and Excel
- APIs
- SaaS Platform Troubleshooting
- Bruno
- Jira Management
- Grafana
- OpenSearch
- Agentic AI
- Prompt Engineering
- LLMs
- RAG
- AI Chatbot Testing

Covid-19 SQL Data Exploration

- Covid-19 SQL Data Exploration This project involved analyzing COVID-19 data using SQL queries to examine case counts, mortality rates, and Regional trends. I utilized SQL for data cleaning, aggregating key metrics, and identifying patterns in the data.
- The project included preparing a detailed report with pivot tables and slicers to summarize the insights effectively. I focused on deriving actionable insights to better understand the pandemic's impact and trends, demonstrating how SQL can be used for data analysis and reporting in public health contexts.

NikithaNayana — Personal Portfolio Website

Designed and developed a responsive personal portfolio website showcasing professional experience, projects, and achievements. Defined the information architecture, UI/UX, and accessibility requirements, with a focus on responsive design, clear content hierarchy, and an inclusive user experience across devices.

Certifications & Awards

- **Certificate of Excellence** — Recognition received at Cint for excellence and contribution.
- **We do what we say**  — Award recognizing ownership, reliability, and follow-through.
- **Data Analysis in Google Sheets**  — Developed skills in data analysis, spreadsheet formulas, data validation, and reporting.
- **Generative AI for Everyone**  — Developed knowledge of Generative AI, LLMs, RAG, prompt engineering, AI automation, responsible AI, and business use cases.
- **Understanding Artificial Intelligence**  — Developed foundational knowledge of AI, machine learning, generative AI, responsible AI, and business use cases.
- **Understanding Prompt Engineering**  — Developed skills in prompt structuring, AI-assisted problem solving, output validation, and iterative prompt refinement.
- **LinkedIn Learnings**  — Completed training in customer service, communication, service desk fundamentals, workplace professionalism, conflict handling, and professional writing.

Interests

- Photography and visual storytelling
- Learning new technologies and technical tools
- Gaming and strategy-based problem solving
- Exploring data-driven insights and analytics
- Keeping up with SaaS platforms and tech trends

Publications

Technical & Product Writing

Nandan BM

Authored articles covering AI, technology, product strategy, accessibility, and digital experiences, with a focus on practical insights and user-centered product thinking.
